BETHLEM HOSPITAL.

REPORT.

To the Right Worshipful the President, the Worshipful the Treasurer, and the Governors of the Royal Hospital of Bethlem.

My Lords and Gentlemen,

In pursuance of our annual duty, we have the pleasure of laying before you our Report for the year 1849, which presents a very fair average of success, but which will hardly escape the charge of monotony, inasmuch as the circumstances under which it is presented are very nearly the same as in many former years.

The number of curable patients admitted during the year was 316, being 124 males, and 192 females.

The number of the patients of this class remaining in the Hospital at the close of the preceding year, including those out on leave, was 213, making together

rather more than the usual average number of curable cases.

CURED.

The number of Patients of this class discharged cured during the year has been 172, consisting of 66 males, and 106 females, being 15 beyond the amount of the preceding year, which it is trusted will be regarded as satisfactory, particularly when it is remembered that 30 cases have been discharged as disqualified, being, in fact, incurable, in consequence of paralysis or other direct impediments; in addition to which a few have been prematurely removed by their friends from the Hospital.

UNCURED.

There have been discharged from the curable establishment 89 uncured, consisting of 29 males, and 60 females, being about one third of those discharged after treatment.

DEATHS.

The number of Patients admitted as curable, who have died during the year, is 18, consisting of 6 males and 12 females.

The following table contains a more particular account of their deaths, as well as of those which have occurred among the incurables and criminals, amounting in all to 24, being not more than the usual proportion of mortality in Bethlem Hospital, and being a very moderate proportion, all things considered.

PARTICULARS OF PATIENTS who have DIED during the year 1849, as Reported by the Physicians to the Bethlem Sub-Committee.

	Sex.	Age	Condition.	Admitted.	Died.	Cause of Death.
1	Male -	13	Curable .	27th Oct. 1848	1st Jan. 1849	Disease of the brain.
2	Female -	48	Curable .	29th Dec. 1848	5th Jan. . .	Disease of the brain.
3	Female -	63	Curable .	15th Dec. 1848	17 Jan. . . .	Diarrhœa, previously in an exhausted state.
4	Male -	33	Curable .	8th Sept. 1848	20th Jan. . .	Phthisis.
5	Male -	47	Curable	22nd Dec. 1848	25th Jan. . .	Diarrhœa.
6	Male -	39	Incurable .	9th Oct. 1846	27th Jan. . .	Disease of brain, producing apoplexy & paralysis.
7	Female -	54	Criminal .	3rd June 1819	1st Feb. . . .	Bronchitis.
8	Female -	60	Curable .	18th Nov. 1848	5th Feb. . .	Disease of the brain.
9	Male -	55	Incurable .	11th Jan. 1839	18th Feb. .	Apoplexy.
10	Male -	29	Criminal .	25th Sept. 1848	3rd March .	Epilepsy.
11	Female -	62	Incurable .	16th Feb. 1828	22nd March .	Gradual exhaustion.
12	Female -	18	Curable .	13th May, 1848	2nd April .	Disease of the brain.
13	Female -	26	Curable .	2nd March 1849	7th April .	Phthisis.
14	Male -	69	Criminal .	7th May, 1847	10th April .	Gradual exhaust., with several apop. attacks.
15	Female -	25	Curable .	13th March, 1849	20th April .	Phthisis.
16	Male -	23	Curable .	16th Sept. 1848	20th June .	Phthisis.
17	Female -	62	Curable .	23rd June, 1849	4th July .	Paralysis.
18	Female -	30	Curable .	11th Jan. 1849	12th July .	Exhaustion.
19	Female -	39	Curable .	6th July, 1849	10th July .	Exhaustion after continued excitement.
20	Male -	38	Curable .	13th July, 1849	17th July .	Disease of the brain.
21	Male .	37	Curable .	1st Sept. 1849	26th Sept. .	Exhaustion from carbuncles and diarrhœa.
22	Female -	49	Curable.	17th Sept. 1849	4th Oct. .	Disease of the brain.
23	Female -	37	Curable .	31st Aug. 1849	5th Oct. . .	Diarrhœa.
24	Female -	69	Curable .	20th July, 1849	6th Oct. .	Diarrhœa.

	201	328	529	42	37	79	119	20	139	362	385	747

The preceding synopsis, prepared with great care and accuracy by the Steward, will display these several particulars and details more lucidly than can be exhibited by mere description.

HEALTH.

Notwithstanding the very unusual mortality of the last autumn in the metropolis, and the alarming spread of cholera thoughout the kingdom, Bethlem has been mercifully spared, as on the former occasion of 1832. With the exception of several instances of diarrhœa, scarcely any of which were fatal, no kindred disease existed, even in the most trying period of the pestilence.

The general health of the Patients throughout the year has been remarkably good, the average of mortality low, and no epidemic has prevailed. We can scarcely be thankful enough for so signal a preservation amidst so extensive an affliction. Several cases have been admitted, if not in a dying condition, at all events while labouring under much infirmity and serious indisposition. This has arisen from charitable considerations, though militating to some extent against the rules of the Hospital, notwithstanding which the mortality has been limited and inconsiderable.

GENERAL TREATMENT AND ATTENDANTS.

Every effort has been made to encourage and preserve that necessary combination of firmness and kindness in the attendants and nurses, which is so essential to secure the comfort and well-being of the Patients.

Many of them have attained considerable standing and experience, and are really estimable persons in their several places and vocations.

It is a very important adjunct in the treatment of the insane to insure a superior order of attendants, as so much must necessarily be left to their discretion and management.

CLASS OF PATIENTS.

The variety of Patients received into the Hospital during the year has been quite as extensive as at any former period, and the Governors have manifested a kind disposition to enlarge rather than curtail the boundaries of eligibility. Those who have seen better days, and small tradesmen, are deeply grateful for the advantages afforded to them by this Establishment, as for these there are very few Institutions to which they have gratuitous access for an afflicted relative.

PUPILS.

The School, if so it may be termed, has been more popular than usual, and the Pupils more numerous than during any former year. This, no doubt, is in a great measure to be attributed to the very liberal diminution of expense upon admission.

Lectures were delivered in the summer season, which it is proposed to renew annually, respecting the nature, the causes, and the treatment of Insanity.

AMUSEMENTS AND OCCUPATIONS.

The Patients have been employed, as far as possible,

in various occupations, and have enjoyed and derived benefit from the various amusements provided for them. This is also an important adjunct in the process of cure.

The average number of Patients employed has been 257.

being 133½ males,
and 123½ females.

The men have been employed as usual in the garden, workshops, and galleries; the women in the laundry and workrooms.

Occasional instances of genius occur in painting and other departments.

DIVINE SERVICE.

The average number attending chapel has been 137.

being 65½ males,
and 71½ females.

This is a great consolation to all such Patients as have any just comprehension of their own condition, and can command their feelings sufficiently to lay hold of higher hopes and better anticipations.

CLASSIFICATION.

The subdivision of Patients has been increased, especially in the basement on the female side, in which the Patients are frequently under excitement.

RESTRAINT.

The degree of restraint, as recorded in the weekly statement presented to the Committee during 1849, continues to be very small.

The average number under restraint:

In 1843	was	3
1844	„	$1\frac{1}{2}$
1845	„	$1\frac{1}{3}$
1846	„	$2\frac{1}{3}$
1847	„	$\frac{90}{365}$
1848	„	$\frac{73}{365}$
1849	„	$\frac{63}{365}$

This statement, it is hoped, will be considered satisfactory.

To suppose that restraint is never necessary is overstraining the bounds of common sense. To reduce it to its lowest limit compatible *with safety* is an obvious duty.

INCURABLES.

On the 31st of December, 1849, the number of Patients of this class was 76, consisting of 40 males and 36 females.

During the year none have been admitted, and there have died, 2 males and 1 female.

CRIMINALS.

The number of Criminal Patients admitted during the year was 28, viz.—26 males and 2 females.

There have died 3, viz.—2 males and 1 female.

Four males having recovered were discharged by order of the Secretary of State, and 20 males were removed by the like authority to another Institution in the country.

There remained at the close of the year 93 men, and

19 women, making 112 of this class, being one more than last year.

We have the honour to remain,

My Lords and Gentlemen,

Your faithful Servants,

Ed. Thos. Monro, M.D.

Alex. Morison, M.D.

25 *January*, 1850.

25		£485	0	0

The Hospital is repaid by Government on account of Criminal Lunatics, the wages of seven male and two female attendants, with an allowance of £35 per annum each for maintenance and clothing.

The wages of male attendants commence at any amount not exceeding £20 per annum, and after they are raised to £20, they increase, if conduct be satisfactory, £1 for the second and third years, and £1. 10*s.* yearly afterwards, until they become £40 per annum, after which no further increase is allowed. Female attendants commence at any amount not exceeding £18 per annum, and after they are raised to £18, they increase with like restriction £1 yearly until they become £25 per annum, after which no further increase is allowed. The wages of male attendants were permitted, previous to the year 1841, to increase to £60 per annum.
